How we measure:

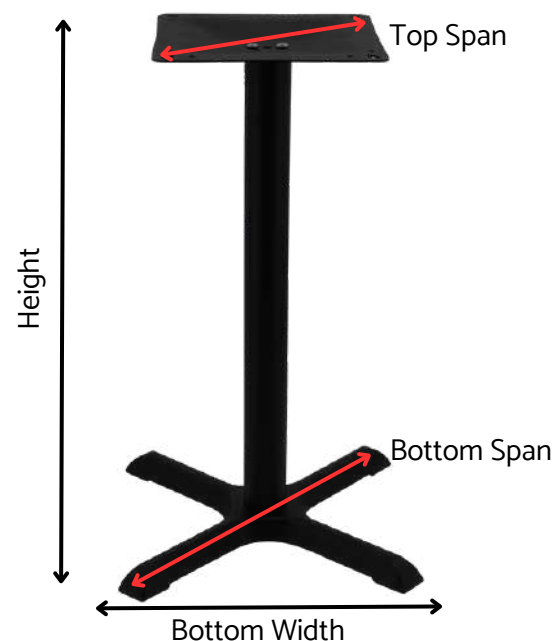

Height = distance from the floor to the highest part of the chair/stool

Depth = distance between the front and the back legs

Width = distance between the two front legs

Floor to seat = distance from the floor to the seat

Arm Height = distance from the floor to the highest point of the arm.

Height = distance from the floor to the highest part of the base

Top Span = distance between the outer edges of the table attachment

Bottom Span = distance between the feet

Bottom Width = horizontal distance between the feet

ICON GUIDE

Furniture certified by Australasian Furnishing Research & Development Institute (AFRDI)

Table bases with FLAT technology - hydraulic technology, which prevents tables from wobbling on uneven surfaces.

This item has been in-house tested by impact testing with 130kg over 1000 times.

SUPER STRONG!
We lowered a Holden Colorado on these chairs and they survived unscathed!

Lightweight (under 4kg)

Requires assembly

Water resistant fabric

Polyurethane leather cushion - our PU leather is as close to real leather as possible.

Stainless Steel

No predrilled holes included

The chairs we ordered are of great quality. But more importantly, the service I received firstly through their website, and then over the phone was second to none. I will definitely be buying through them again and recommend others to do so as well. - Sarah M.
